EXPERIENCE

PROJECTS

ClassPro | **Typescript, React, Go, NextJS, Supabase**

- Serving over 15,000+ monthly active users with 1.1M+ page views per month, ensuring scalability and stability for the students.
- Incorporated a Golang fiber server to scrape data which resulted in 40% faster data scraping and fetches reducing the wait time
- Optimized platform performance to handle peak traffic, ensuring 99.9% uptime and seamless access during critical academic periods.

manic | **TypeScript, React, Hono, Bun, OXC**

- Built The fastest framework for React. Delivering sub 150ms cold starts and 500ms production builds in benchmark suites against Next.js, Remix, Astro, Nuxt, TanStack Start, and Vite-based frameworks
- Implemented production-grade optimizations including parallel transpilation, OXC-powered compilation/minification, and Bun-native runtime pipelines, enabling lightweight 400KB production outputs and ultra-fast rebuild performance
- A full-on Fullstack framework with Hono backend and React frontend, featuring filesystem routing, automatic API route generation, and sub-20ms hot reloads using Bun's native transpiler

rocket | **Tauri, React, Typescript, Rust**

- Developed a super-fast, lightweight code editor optimized for performance, achieving 30% greater RAM efficiency compared to industry standards.
- Implemented advanced code completion and Language Server Protocol (LSP) support for over 120+ file formats with syntax highlighting.
- Significantly reduced resource load for users, leading to a smoother and more efficient coding experience when developing a resource-intensive project

EDUCATION

SKILLS

Languages	Javascript, Typescript, Python, Go
Frameworks	Next.js, ReactJS, Astro, Solid, FastAPI, Pytorch, Express, Hono, Elysia, Fiber, React Native, Tauri, Framer Motion, TailwindCSS
Others	Figma, Supabase, PostgreSQL, Vercel, Render, Deno, Bun, Git
