EXPERIENCE

Software Engineer Intern Dec 2025 - May 2026
AskMeIdentity *Bengaluru*

- Designed and implemented the UI and UX for the LMX platform, delivering 10+ production screens and defining user flows from wireframes to deployed features. - Led the redesign of 4+ core modules across the application suite, standardizing layout patterns and improving visual consistency across products. - Built a cross platform desktop application using Electron, implementing 3 major feature flows including authentication, content access, and update handling.

Research Intern Mar 2025 - Feb 2026
Samsung R&D Institute India - Bangalore *Chennai*

- Working as a Technical researcher with team of 4 for Developing AI solutions, focusing on innovative approaches and optimizing solutions - Collaborating on industry-level as Research Intern in the Samsung PRISM program

Software Engineer Intern Oct 2025 - Dec 2025
EmendoAI *San Francisco Bay Area*

- Collaborated with design and backend teams to deliver updates faster and maintain production quality during UI and logic changes. - Authored comprehensive technical documentation for testing workflows and architecture components, improving onboarding speed for new contributors by 30%. - Fixed 50+ bugs, including navigation regressions and data overflow issues, directly improving platform stability and preventing user-facing crashes.

Frontend Developer Intern Jan 2025 - Jul 2025
SRM Innovation and Incubation Centre *Chennai, Tamil Nadu, India*

- Rebuilt 60+ pages from scratch to create a faster, more modern, user-friendly and responsive website with smooth animations for 3+ sites. - Achieved 25% increase in user engagement and a 10% reduction in bounce rate through optimizations in performance, accessibility, and SEO. - Coordinated and maintained version control workflows, ensuring smooth collaboration and code integration across updates.

PROJECTS

ClassPro | **Typescript, React, Go, NextJS, Supabase**

- Serving over **15,000+ monthly active users** with **1.1M+ page views per month**, ensuring scalability and stability for the students.
- Incorporated a Golang fiber server to scrape data which resulted in 40% faster data scraping and fetches reducing the wait time
- Optimized platform performance to handle peak traffic, ensuring 99.9% uptime and seamless access during critical academic periods.

manic | **TypeScript, React, Hono, Bun, OXC**

- Built The fastest framework for React. Delivering sub 150ms cold starts and ˜500ms production builds in benchmark suites against Next.js, Remix, Astro, Nuxt, TanStack Start, and Vite-based frameworks
- Implemented production-grade optimizations including parallel transpilation, OXC-powered compilation/minification, and Bun-native runtime pipelines, enabling lightweight ˜400KB production outputs and ultra-fast rebuild performance
- A full-on Fullstack framework with Hono backend and React frontend, featuring filesystem routing, automatic API route generation, and sub-20ms hot reloads using Bun's native transpiler

rocket | **Tauri, React, Typescript, Rust**

- Developed a super-fast, lightweight code editor optimized for performance, achieving ˜30% greater RAM efficiency compared to industry standards.
- Implemented advanced code completion and Language Server Protocol (LSP) support for over 120+ file formats with syntax highlighting.
- Built an agentic coding assistant capable of autonomously understanding repository context, planning multi-step code changes, and executing file-level edits, reducing repetitive development effort by ˜40%.

EDUCATION

SRM Institute of Science and Technology Expected 2027
BTech Computer Science Engineering with AIML *CGPA: 9.41*

SKILLS

Languages	Javascript, Typescript, Python, Go
Frameworks	Next.js, ReactJS, Astro, Solid, FastAPI, Pytorch, Express, Hono, Elysia, Fiber, React Native, Tauri, Framer Motion, TailwindCSS
Others	Figma, Supabase, PostgreSQL, Vercel, Render, Deno, Bun, Git
