## EXPERIENCE

**Software Engineer Intern** Dec 2025 - May 2026
AskMeIdentity *Bengaluru*

- Designed and implemented the UI and UX for the LMX platform, delivering 10+ production screens and defining user flows from wireframes to deployed features. - Led the redesign of 4+ core modules across the application suite, standardizing layout patterns and improving visual consistency across products. - Built a cross platform desktop application using Electron, implementing 3 major feature flows including authentication, content access, and update handling.

**Research Intern** Mar 2025 - Feb 2026
Samsung R&D Institute India - Bangalore *Chennai*

- Working as a Technical researcher with team of 4 for Developing AI solutions, focusing on innovative approaches and optimizing solutions - Collaborating on industry-level as Research Intern in the Samsung PRISM program

**Software Engineer Intern** Oct 2025 - Dec 2025
EmendoAI *San Francisco Bay Area*

- Collaborated with design and backend teams to deliver updates faster and maintain production quality during UI and logic changes. - Authored comprehensive technical documentation for testing workflows and architecture components, improving onboarding speed for new contributors by 30%. - Fixed 50+ bugs, including navigation regressions and data overflow issues, directly improving platform stability and preventing user-facing crashes.

**Frontend Developer Intern** Jan 2025 - Jul 2025
SRM Innovation and Incubation Centre *Chennai, Tamil Nadu, India*

- Rebuilt 60+ pages from scratch to create a faster, more modern, user-friendly and responsive website with smooth animations for 3+ sites. - Achieved 25% increase in user engagement and a 10% reduction in bounce rate through optimizations in performance, accessibility, and SEO. - Coordinated and maintained version control workflows, ensuring smooth collaboration and code integration across updates.

## PROJECTS

**ClassPro** | **Typescript, React, Go, NextJS, Supabase**

- Serving over **15,000+ monthly active users** with **1.1M+ page views per month**, ensuring scalability and stability for the students.
- Incorporated a Golang fiber server to scrape data which resulted in 40% faster data scraping and fetches reducing the wait time
- Optimized platform performance to handle peak traffic, ensuring 99.9% uptime and seamless access during critical academic periods.

**manic** | **TypeScript, React, Hono, Bun, OXC**

- Built The fastest framework for React. Delivering sub 150ms cold starts and 500ms production builds in benchmark suites against Next.js, Remix, Astro, Nuxt, TanStack Start, and Vite-based frameworks
- Implemented production-grade optimizations including parallel transpilation, OXC-powered compilation/minification, and Bun-native runtime pipelines, enabling lightweight 400KB production outputs and ultra-fast rebuild performance
- A full-on Fullstack framework with Hono backend and React frontend, featuring filesystem routing, automatic API route generation, and sub-20ms hot reloads using Bun's native transpiler

**rocket** | **Tauri, React, Typescript, Rust**

- Developed a super-fast, lightweight code editor optimized for performance, achieving 30% greater RAM efficiency compared to industry standards.
- Implemented advanced code completion and Language Server Protocol (LSP) support for over 120+ file formats with syntax highlighting.
- Built an agentic coding assistant capable of autonomously understanding repository context, planning multi-step code changes, and executing file-level edits, reducing repetitive development effort by 40%.

## EDUCATION

SRM Institute of Science and Technology Expected 2027
**BTech** Computer Science Engineering with AIML *CGPA: 9.41*

## SKILLS

| | |
|---|---|
| **Languages** | Javascript, Typescript, Python, Go |
| **Frameworks** | Next.js, ReactJS, Astro, Solid, FastAPI, Pytorch, Express, Hono, Elysia, Fiber, React Native, Tauri, Framer Motion, TailwindCSS |
| **Others** | Figma, Supabase, PostgreSQL, Vercel, Render, Deno, Bun, Git |
