EXPERIENCE

Software Engineer Intern AskMeIdentity	Dec 2025 - May 2026 <i>Bengaluru</i>
- Designed and implemented the UI and UX for the LMX platform, delivering 10+ production screens and defining user flows from wireframes to deployed features. - Led the redesign of 4+ core modules across the application suite, standardizing layout patterns and improving visual consistency across products. - Built a cross platform desktop application using Electron, implementing 3 major feature flows including authentication, content access, and update handling.	
Research Intern Samsung R&D Institute India - Bangalore	Mar 2025 - Feb 2026 <i>Chennai</i>
- Working as a Technical researcher with team of 4 for Developing AI solutions, focusing on innovative approaches and optimizing solutions - Collaborating on industry-level as Research Intern in the Samsung PRISM program	
Software Engineer Intern EmendoAI	Oct 2025 - Dec 2025 <i>San Francisco Bay Area</i>
- Collaborated with design and backend teams to deliver updates faster and maintain production quality during UI and logic changes. - Authored comprehensive technical documentation for testing workflows and architecture components, improving onboarding speed for new contributors by 30%. - Fixed 50+ bugs, including navigation regressions and data overflow issues, directly improving platform stability and preventing user-facing crashes.	
Frontend Developer Intern SRM Innovation and Incubation Centre	Jan 2025 - Jul 2025 <i>Chennai, Tamil Nadu, India</i>
- Rebuilt 60+ pages from scratch to create a faster, more modern, user-friendly and responsive website with smooth animations for 3+ sites. - Achieved 25% increase in user engagement and a 10% reduction in bounce rate through optimizations in performance, accessibility, and SEO. - Coordinated and maintained version control workflows, ensuring smooth collaboration and code integration across updates.	

PROJECTS

agent-orchestrator | lavalamp |

- An open-source Cloudflare-native coding agent harness enabling AI-assisted software development directly from the terminal.
- Designed core infrastructure including semantic code indexing, a hash-anchored file editing engine improving edit reliability by 42%, resumable agent sessions, and approval-based command execution.
- Architected an extensible multi-agent framework with expert subagents and Cloudflare Workers AI integration, providing secure, local-first AI development workflows.

bullet |

- Built an agentic AI security platform that reasons over 7+ web application surfaces, generates attack hypotheses, prioritizes high-signal leads, and autonomously executes multi-step tool-calling workflows.
- Engineered a 25+ phase reconnaissance and vulnerability-validation pipeline covering authentication, SQL injection, XSS, SSRF, business logic, API discovery, and JavaScript analysis.
- Integrated knowledge-graph reasoning to correlate endpoints, exposed secrets, authentication context, findings, and attack chains into structured security reports.

EDUCATION

SRM Institute of Science and Technology	Expected 2027
BTech Computer Science Engineering with AIML	<i>CGPA: 9.41</i>

SKILLS

Languages	Python, Typescript, Javascript, Go
Frameworks	Pytorch, YOLO, LangGraph, AI SDK, FastAPI, Next.js, ReactJS, Express, Hono, Fiber
Others	OpenAI, HuggingFace, Supabase, PostgreSQL, Git
